Journal of Computational and Applied Mathematics 69 (1996) 379–380

JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

# Author Index to Volume 69 (1996)

(The issue number is given in front of the page numbers.)

**Alfaro, M., G. López** and **M.L. Rezola,** Some properties of zeros of Sobolev-type orthogonal polynomials (1) 171–179
**Amodio, P.** and **F. Mazzia,** Parallel block preconditioning for the solution of boundary value methods (2) 191–206

**Bainov, D.** and **E. Minchev,** Oscillation of the solutions of impulsive parabolic equations (2) 207–214
**Bissu, S.K.,** see **Joshi, C.M.** (2) 251–259
**Burrage, K.,** see **Erhel, J.** (2) 303–318

**Collins Jr., E.G.,** see **Ge, Y.** (2) 215–241
**Cuyt, A., K.A. Driver** and **D.S. Lubinsky,** A direct approach to convergence of multivariate, nonhomogeneous, Padé approximants (2) 353–366
**Cyphers, C., M. Paprzycki** and **A. Karageorghis,** High performance solution of partial differential equations discretized using a Chebyshev spectral collocation method (1) 71– 80

**De Mey, G.,** see **Matthys, L.** (2) 319–329
**Driscoll, T.A.** and **L.N. Trefethen,** Pseudospectra for the wave equation with an absorbing boundary (1) 125–142
**Driver, K.A.,** see **Cuyt, A.** (2) 353–366

**Erhel, J., K. Burrage** and **B. Pohl,** Restarted GMRES preconditioned by deflation (2) 303–318

**Ge, Y., L.T. Watson** and **E.G. Collins Jr.,** A comparison of homotopies for alternative formulations of the $L^2$ optimal model order reduction problem (2) 215–241

**Homeier, H.H.H.,** Analytical and numerical studies of the convergence behavior of the $\mathscr{J}$ transformation (1) 81–112

**Joshi, C.M.** and **S.K. Bissu,** Inequalities for some special functions (2) 251–259
**Jumarhon, B.** and **S. McKee,** Product integration methods for solving a system of nonlinear Volterra integral equations (2) 285–301

**Karageorghis, A.,** see **Cyphers, C.** (1) 71– 80
**Kölbig, K.S.** and **W. Strampp,** Some infinite integrals with powers of logarithms and the complete Bell polynomials (1) 39– 47
**Krzyworzcka, S.,** Extension of the Lanczos and CGS methods to systems of nonlinear equations (1) 181–190

**Lahtinen, A.,** On the choice of the initial value of a quadratic spline in positive interpolation (1) 13– 25
**Lambert, H.,** see **Matthys, L.** (2) 319–329
**Lewanowicz, S.,** Second-order recurrence relation for the linearization coefficients of the classical orthogonal polynomials (1) 159–170
**Li, J.-L.,** On the growth of meromorphic functions defined by quasi-regular $c$-fractions (2) 367–377
**López, G.,** see **Alfaro, M.** (1) 171–179
**Lubinsky, D.S.,** see **Cuyt, A.** (2) 353–366

**Manni, C.,** $C^1$ comonotone Hermite interpolation via parametric cubics (1) 143–157
**Matthys, L., H. Lambert** and **G. De Mey,** A recursive construction of particular solutions to a system of coupled linear partial differential equations with polynomial source term (2) 319–329
**Mazzia, F.,** see **Amodio, P.** (2) 191–206
**McKee, S.,** see **Jumarhon, B.** (2) 285–301
**McLean, W., V. Thomée** and **L.B. Wahlbin,** Discretization with variable time steps of an evolution equation with a positive-type memory term (1) 49– 69
